EXPERIENCE

Frontend Developer (Intern → Full-Time) | Vidyaone | June 2025 – Present

- Worked on responsive web application using HTML, Tailwind CSS, Javascript and Next.js, including API integration and performance optimization.
- Promoted From Internship to Full-time role based on performance and contribution to live projects.

PROJECTS

1. **Blog Website with Appwrite Backend**
   - **Stack:** React, Redux Toolkit, Appwrite, React Router
   - Build a fully functional blog platform with create, update, delete, and view features.
   - Used Redux for state management and Appwrite as a backend service.
   - Implemented responsive UI with React Router for seamless navigation.

2. **Gemini AI Clone**
   - **Stack:** React, Gemini API
   - Developed a user interface to interact with Google's Gemini AI using its official API.
   - Key features include message sending, dynamic response rendering, and a clean UI.
